# Your cost model

**The total cost of corrugated includes five key variables.**

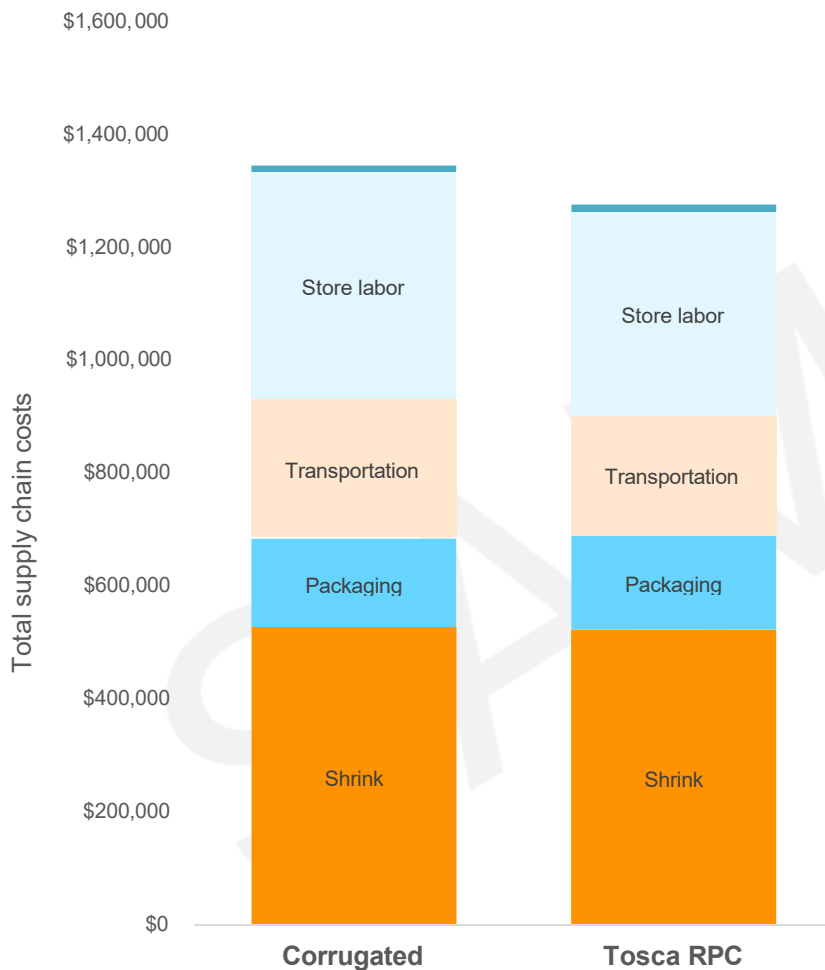

When you add them up and monitor savings over time, it pays to switch to RPCs:

- 1. Shrink**
- 2. Packaging**
- 3. Transportation**
- 4. Store labor**
- 5. OCC (Old Corrugated Containers) impact**

**Grocery**  
Store

# Savings summary

OCC impact credit: \$10,000

## Potential savings:

Shrink, packaging, transportation, labor – they all add up. It pays to switch to RPCs.

**\$ 70,000**

## Your supply chain:

Stores: 200

Annualized volume: 3M

Corrugated solution: 20 ice pack top box

Supplier Location: City, USA to Distribution Center

**Grocery**  
Store

# 1. Transportation

**Start filling up trucks. Stop paying to ship air.**

Tosca RPCs were made for stacking high, but not corrugated. Weaker boxes can't stack as high and get crushed, leaving wasted space in trucks. Our sturdy, standardized footprint helps you make fewer trips.

Transportation	Corrugated	Tosca RPCs
Trucks used	100	50
Trucks full	100	100
Trucks empty	100	50
Total trucks	300	150

**Total savings from transportation:**
