

# Environment Policy Statement

Tosca is committed to minimizing both its own and its customer's impacts on the environment through eliminating waste at every turn.

Tosca's reusable packaging is designed to avoid food waste, optimize transportation, and improve efficiency by reducing cost and labor while requiring only a fraction of the raw material used to manufacture single use alternatives across the whole value chain.

Specifically, we focus on reducing environmental impacts by:

- Providing fully reusable products (RPCs, bins, bulk containers, pallets etc.) designed to reduce the environmental footprint of packaging to an absolute minimum.
- Incorporating ever increasing volumes of recycled content in our packaging solutions.
- Reducing waste through minimizing food damage and shrinkage and preserving food quality and sending unusable containers for recycling.
- Minimizing water usage for container sanitation at facilities.
- Reducing greenhouse gas emissions by managing facility energy use, utilizing renewable and/or green energy sources, and minimizing the number of trucks on the road by developing more space efficient pallets and RPCs.

**Eric Frank** | President and CEO
